

## **JD - Mobile & Frontend Developer**

### **Job Summary:**

We are looking for a skilled **Mobile & Frontend Developer** to join our team to build and enhance mobile and web applications with seamless user experiences. The ideal candidate will have strong expertise in building intuitive and high-performance mobile applications along with modern frontend web development experience.

---

### **Key Responsibilities:**

- Design, develop, and maintain cross-platform mobile applications (iOS and Android) using technologies like React Native or Flutter.
- Build responsive and engaging web frontends using React.js, Vue.js, or Angular.
- Collaborate with designers, backend developers, and product managers to translate UI/UX wireframes into high-quality code.
- Optimize mobile and web applications for maximum speed, responsiveness, and usability.
- Implement and maintain robust application architecture, state management, and reusable component libraries.
- Debug and fix issues, perform unit testing, and ensure the quality of deliverables.
- Integrate RESTful APIs and third-party SDKs with mobile and web applications.
- Stay up to date with emerging trends and technologies in mobile and web development.

---

### **Required Skills & Qualifications:**

- Bachelor's degree in Computer Science, Engineering, or a related field (or equivalent experience).
- 3+ years of hands-on experience in mobile application development using **React Native, Flutter, Swift, or Kotlin**.
- Solid experience with frontend frameworks like **React.js, Vue.js, or Angular**.
- Strong understanding of **JavaScript, TypeScript, HTML5, CSS3**, and responsive design principles.
- Experience with mobile CI/CD pipelines, publishing apps on App Store and Google Play.
- Familiarity with mobile design guidelines and best practices (Material Design, Human Interface Guidelines).

Head Quarter Office:  
128 City Road,  
London, EC1V 2NX

Registered office:  
Devopstrio (India) Pvt.  
Embassy Golf Links  
Bengaluru, Karnataka

- Experience integrating APIs and managing data through **Redux, Context API**, or similar.
- Knowledge of version control systems (e.g., Git, GitHub).

---

#### Nice to Have:

- Experience with **Progressive Web Apps (PWAs)**.
- Familiarity with backend services (Node.js, Firebase, GraphQL).
- Exposure to UI/UX design tools (Figma, Adobe XD).
- Testing frameworks like Jest, Detox, or Appium.
- Experience working in Agile or DevOps environments.
